

AMAZONIAN ARACHNIDA AND MYRIAPODA. KEYS FOR THE IDENTIFICATION TO CLASSES, ORDERS, FAMILIES, SOME GENERA, AND LISTS OF KNOWN SPECIES.

Pensoft Series Faunistica 24
ISSN 1312-0174
ISBN 954-642-118-9
297x195, photos, graphs, index, bibliography
In English.
Hardcover, 590 pp.
EURO 78.00

An "Identification Manual" on the Amazonian arachnids and myriapods for beginners and non-specialists has been demanded for many years. Most taxonomic literature on Neotropical Arachnida and Myriapoda is strictly descriptive, keys in translated and accepted textbooks are restricted to the higher taxa and first introductions to Amazonian arthropods refer to specific sampling sites and are mainly devoted to insects. On the other hand, our taxonomical knowledge on Amazonian Arthropoda was much improved due to investigations for the last two decades, cooperatively between INPA and the Tropical Ecology Working Group at the Max-Planck-Institute for Limnology in Ploen/Germany. For this reason, we now make a first attempt: (1) to provide a book with illustrated keys for neophytes and anyone interested in Neotropical Arachnida and Myriapoda; (2) to supply a source of references on the actual taxonomic knowledge of Amazonian Arachnida and Myriapoda; (3) to introduce and recommend approved sampling techniques developed for terrestrial arthropods in the Neotropics; (4) to stimulate education and research in Neotropical Arachnida and Myriapoda.

Table of contents: Editoria * Foreword * Book objectives * Sampling sites at Manaus * Taxonomical classification – ARACHNIDA: identification to orders * Acari * Amblypygi * Araneae * Opiliones * Palpigradi * Pseudoscorpiones * Ricinulei * Schizomida * Scorpiones * Solifugae * Uropygi – MYRIAPODA: identification to classes * Chilopoda: * Geophilomorpha * Lithobiomorpha * Solopendromorpha * Scutigermorpha * Diplopoda * Pauropoda * Symphyla * Recommended sampling techniques

CONHECENDO OS NEMATÓIDES: NEMATOLOGIA GERAL. LIVRO-TEXTO PARA ESTUDANTES E NÃO ESPECIALISTAS.

Pensoft Series Parasitologica No 1
ISBN 954-642-137-5
145x210, numerous photos, pictures, graphs, lists of relevant CD's, websites and journals, bibliography, index
In Portuguese
Paperback, 230 pp.
EURO 18.00

"Conhecendo os Nematóides: Nematologia Geral" é o primeiro de uma série de livros-textos destinados a proporcionar uma visão mais abrangente e moderna a respeito dos nematóides aos estudantes e não especialistas, esperando-se que o seu conteúdo seja tão estimulante quanto informativo ao leitor. Este primeiro livro, inaugurando uma série, além de

incluir subsídios sobre as principais doenças causadas por nematóides, trata objetivamente de diferentes aspectos relativos a tais organismos, como a organização básica, as estratégias reprodutivas, as hipóteses evolutivas para o filo Nematoda, a evolução do parasitismo e os métodos de controle.

TITLES ON THE NATURE OF SOUTH AMERICA

Aquatic Biodiversity in Latin America **Biodiversidad Acuática en América Latina**

Series Editors: Joachim Adis, Jorge R. Arias,
Guillermo Rueda-Delgado & Karl Matthias Wantzen

SINCE MANY YEARS, STUDENTS FROM NUMEROUS COUNTRIES COMPLAIN ABOUT THE LACK OF “TOOLS” TO IDENTIFY AQUATIC INVERTEBRATES FROM LATIN AMERICA. KEYS FOUND IN ACCEPTED ENTOMOLOGICAL TEXTBOOKS ARE MOSTLY HIGHLY LIMITED, SUPERFICIAL AND/OR TOO POPULAR-SCIENCE. ON THE OTHER HAND, MORE ADVANCED KEYS IN ACADEMIC BOOKS ON AQUATIC INSECTS FAIL TO COVER NEOTROPICAL REPRESENTATIVES IN DUE DETAIL. THE FEW THAT DO, HOWEVER, ALSO SHOW TOO MANY DEFECTS IN SCOPE AND PRESENTATION TO BE CONSIDERED UP-TO-DATE!

AN INTERNATIONAL TEAM OF EDITORS COMBINED THEIR EFFORTS WITH PENSOFT PUBLISHERS TO LAUNCH A NEW MAJOR SERIES ON THE AQUATIC BIODIVERSITY OF LATIN AMERICA. ABOUT 15 MONOGRAPHS, WRITTEN BY SCIENTISTS FROM VARIOUS COUNTRIES, WILL OFFER A NEW, UNRIVALLED, VIEW ON THE MARVELOUS AQUATIC WORLD OF SOUTH AMERICA! THE SERIES IS ADDRESSED TO ZOOLOGISTS, ECOLOGISTS, HYDROBIOLOGISTS, BIOGEOGRAPHERS, CONSERVATIONISTS AND STUDENTS INTERESTED IN AQUATIC BIODIVERSITY. THE SERIES WILL BE AN IMMINENT TOOL FOR ANY BIOLOGICAL LIBRARY.

Volume **1**
AMAZON FISH PARASITES
(Second edition)
Vernon E. Thatcher, Curitiba, Brazil

165x240 mm
400 pp, including 194 plates of figures in line drawings and photos (15 plates in color). In English and Spanish.
Publication date: early 2006.
Prepublication price: EURO 88.00

The book covers the following Phyla and Classes: Protozoa (Myxozoa, Sporozoa), Plathelminthes (Trematoda, Monogenoidea, Cestoda), Nematoda, Acanthocephala, Crustacea (Copepoda, Branchiura, Isopoda), Hirudinea and Pentastomida that are known to parasitize Amazonian fishes. The text is in English and the identification keys to families and genera in both English and Spanish. In addition to the keys and checklists, each chapter gives information on the morphology, life cycles, pathology, prevention, treatment, collection and method, as well as general reference data on each taxon. An alphabetic table of host fishes with their respective parasites is provided. The book will prove to be useful for parasitologists, ichthyologists, aquaculturists, pisciculturists and all those interested in Neotropical fish parasites.

Volume **2**
EPHEMEROPTERA OF SOUTH AMERICA
Eduardo Dominguez, Tucumán, Argentina
165x240 mm
490 pp plus 218 b/w plates, 16 color plates, hardcover.
In English. Publication date: early 2006.
Prepublication price: EURO 95.00

The book covers all known 14 families, 103 genera and 470 species of the insect order Ephemeroptera from continental South America. It includes updated keys to separate (in English and Spanish) families, genera and species (when possible), as well as complete reference data on each taxon, considering its status, characters, biology and distribution. The book is addressed to specialists in systematics, to ecologists, limnologists and biologists in general.

Forthcoming monographs on Aquatic Biodiversity in Latin America (ABLA Series), with leading authors of each:

1. **ANURA:** *Walter Hoedl*, Vienna, Austria
2. **AQUATIC ACARI:** *Hugo R. Fernandez*, San Miguel de Tucuman, Argentina & *Beatriz Rosso de Ferradas*, Córdoba, Argentina
3. **BIVALVIA:** *Maria Christina Mansur*, Porto Alegre, Brazil & *Cristián Ituarte*, La Plata, Argentina
4. **BLEPHACERIDAE (DIPTERA):** *Greg Courtney*, Ames, USA
5. **CERATOPOGONIDAE (DIPTERA):** *Gustavo Spinelli*, La Plata, Argentina & *Art Borken*, Enderby, Canada
6. **CLADOCERA & COPEPODA:** *Juan Paggi*, Santo Tomé, Argentina
7. **CHIRONOMIDAE (DIPTERA):** *Trond Andersen*, Bergen, Norway
8. **EPHYDRIDAE (DIPTERA):** *Wayne Mathis*, Washington, D.C., USA & *Tadeusz Zatwarnicki*, University of Opole, Poland
9. **MALACOSTRACA:** South America: *Célio Magalhães*, Manaus, Brazil, *Georgina Bond*, Backup, Porto Alegre, Brazil; Mexico & Central America: *Fernandez Alvarez*, México D.F., Mexico
10. **MECOPTERA, NEUROPTERA:** *Norman Penny*, San Francisco, USA
11. **MEGALOPTERA:** *Atilano Contreras-Ramos*, Pachuca, Mexico
12. **ODONATA:** *Alonso Ramírez*, San Juan, Puerto Rico
13. **OLIGOCHAETA:** *Mercedes Marchese*, Santa Fe, Argentina
14. **PLECOPTERA:** *Bill Stark*, Clinton, USA
15. **PORIFERA:** *Cecília Volkmer-Ribeiro*, Porto Alegre, Brazil & *Inés Ezcurra de Drago*, Santa Fe, Argentina
16. **PSYCHODIDAE (DIPTERA):** *Ruediger Wagner*, Schlitz, Germany
17. **ROTIFERA:** *Susana Paggi*, Santo Tomé, Argentina
18. **SIMULIIDAE (DIPTERA):** *Sixto Coscaron*, La Plata, Argentina
19. **TIPULIDAE (DIPTERA):** *Jon Gelhaus*, Philadelphia, USA
20. **TRICHOPTERA:** *Ralph W. Holzenthal*, St. Paul, USA

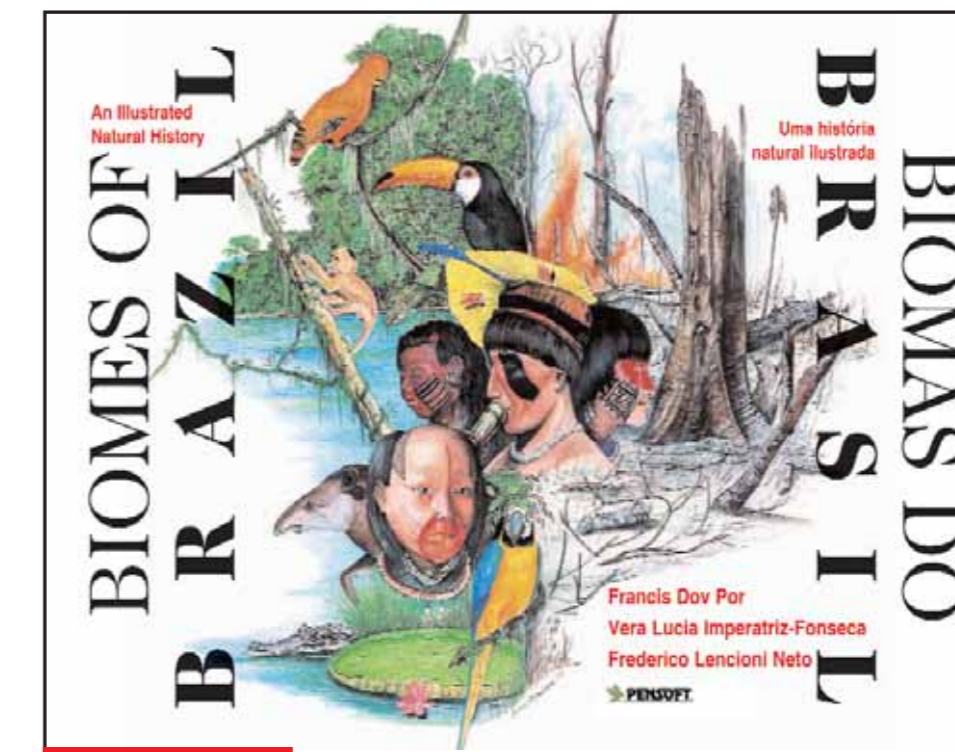

BIOMES OF BRAZIL. AN ILLUSTRATED NATURAL HISTORY

ISBN 954-642-237-1
210x275, original colour drawings, graphs and maps, index, bibliography. Bilingual – in English and Portuguese. Hardcover, 208 pp.
Publication date: September 2005.
Prepublication price: EURO 35.00

BIOMES OF BRAZIL is a didactic presentation of the eight most important biomes of this subcontinent, for the use of the academic and student reader. The bilingual text of the book makes it accessible also to the environmentalist and ecotourism public world-wide. The eight chapters follow the same sequence of treatment, from a short geologic and environmental introduction to the presentation of the respective flora and fauna and ending with human aspects and environmental issues. The most recent level of knowledge is being reviewed, leaving space also for new and original considerations. The first author is Professor Emeritus of Zoology in Israel. He has lectured for 25 years also in Brazil, on subjects of nature protection and evolution, while first-hand studying also some of the biomes treated in this book. The second author is professor of ecology at the University of São-Paulo, where she is a forefront specialist in bees and in sociobiology. She is also involved for many years in environmental education and politics in Brazil. The book is exclusively hand-illustrated, with didactic drawings and schemes and especially with large-scale dioramas of the different biomes. Most of the illustrations are done by the third author, a consummate naturalist and ornithologist and a resourceful teacher.

BIOMAS DO BRASIL é uma apresentação didática dos oito ambientes principais deste sub-continente para o leitor acadêmico e estudantil. Sendo bilíngüe, português- inglês, o livro pode servir também para o público ambientalista e ecoturístico internacional. Os diferentes biomas são tratados cada um numa seqüência padronizada, desde um curto esboço geológico e climático, passando pela sua flora e fauna e até os aspectos humanos e

de manejo ambiental. O mais recente estado de conhecimentos está sendo sintetizado, proporcionando entretanto vários enfoques e conclusões originais. O primeiro autor, professor emérito de zoologia Israelense, lecionou no Brasil durante 25 anos sobre assuntos de proteção ambiental e de evolução, e estudou também alguns dos biomas tratados neste livro. A segunda autora, professora de ecologia na Universidade de São Paulo,

eminente especialista em abelhas e de sócio-biologia, esta envolvida há muito tempo em assuntos de educação e de política ambiental no Brasil. O livro é exclusivamente ilustrado com desenhos didáticos, especialmente com grandes dioramas dos biomas tratados, principalmente pelo punho do terceiro autor, um naturalista ornitólogo, de rara convivência com a natureza e um experiente didata.
