## FOCUS AND SCOPE

**BIORISK – Biodiversity and Ecosystem Risk Assessment**  
is a peer-reviewed, open-access, rapid online journal  
launched to publish research of biodiversity and ecosystem  
risks and opportunities caused by global change and local  
factors.

BioRisk publishes papers in environmental science describ-  
ing and analyzing risks for biodiversity and ecosystems in  
any part of the world.

BioRisk shall accept manuscripts in the following topics:

- Consequences for biodiversity and ecosystem change caused by habitat fragmentation
- Land use environmental chemical pollution
- Loss of pollinators
- Climate change
- Biological invasions
- Socio-economic aspects of biodiversity and ecosystem risks
- Ecotoxicology

- Risks from and for agriculture and forestry practices
- Ecological expertise and environmental assessment
- Methods and tools for biodiversity risk assessment
- Goods and services at risk
- Other environmental issues

The following categories of papers will be considered:

- Research articles based on original research
- Review articles – longer articles, offering a most complete overview or historical perspective of a topic
- Monographs and collection of papers with no limit in size, published as *special issues*
- Short communications
- Letters and Discussion papers
- Book reviews

The journal will be published in an online version and on paper.

Authors retain copyright and grant the journal right of first publication, both online and printed, with the work simultaneously licensed under a [Creative Commons Attribution License](http://creativecommons.org/licenses/by/3.0/) (<http://creativecommons.org/licenses/by/3.0/>) that allows others to share the work with an acknowledgement of the work's authorship and initial publication in this journal.

All articles are published without barriers to access,  
immediately upon acceptance!
